

	ESUY (H00V-D)	ESY
conductor material:	bare copper, extra fine wire conductors, high flexible	bare copper, fine wire conductors
braiding:	braiding of bare copper wires over the stranded copper	no braiding, copper conductors of stranded wires
sheath:	PVC-jacket, transparent (glass clear), compound type TM2 according DIN VDE 0281 part 1	PVC-jacket, transparent (glass clear), compound type TM2 according DIN VDE 0281 part 1
test voltage:	2000 V	
spark test (during winding):	16qmm to 35qmm - 5000 V 50qmm to 70qmm - 6000 V 95qmm to 240qmm - 8000 V	
minimum bending radius:	approx. 12 x cable Ø	
temperature range:	-5 up to +70°C	
insulation resistance:	min. 20 MΩ x km	
properties:	For these cable types no nominal voltages are mentioned, as these are: only used for earthing performances. For further requirements see European Norm EN 61230 and DIN VDE 0683 part 100: Live working - Portable equipment for earthing and earthing.	
application:	These high flexible earth conductors are used for earthing of portable equipment and short-circuiting. These cables specially perform a protective function in repair live working of high voltage power supply company as EVU, in railway systems, failing current equipment, alternating current systems and in networks of transmission and distribution. Because of that these are designated as safety cables. These earthing cables offer special characteristics with low weights, high flexibility to a wide temperature range and the behavior in high temperature. The protective sheath over conductor assures the essential function for protection against the mechanical and chemical stresses.	

The products and information presented here are for technical calculation only.

They are subject to technical progress and in no way represent the ability of shipment.

Outer diameters are approximately.

SPEZIAKABEL / SPEZIALLEITUNGEN

ESUY, ESY

earthing cable of braid wires over core strands in adapted to DIN
VDE 0283 part 3, and EN 61138
